Trow Pool Web Site: [http://homepage.ntlworld.com/j\\_d.bryant1/trowpool.htm](http://homepage.ntlworld.com/j_d.bryant1/trowpool.htm)

**W**e need your help! The weir at Trow Pool was vandalised many years ago and we plan to fix it. Cherwell District Council has agreed to supply the materials (sandbags and clay). All we have to do is provide the labour. But that's easier said than done because although we have many members who fish at Trow, very few turn out to help. At most it will take one weekend and we'll close Trow Pool while we carry out the work. And if you help out you can fish free for that weekend whether a member or not!

We are looking for as many people as possible as we may also carry out a clean up and de-weeding of the water at the same time.

We will provide free food & drink on the day and gloves.

Fixing the weir will raise the water level by at least 300 mm and it will make a big difference to the quality of your fishing.

We intend to carry out the work in two to three weeks time. So please ring and pledge your support or e-mail me (James Bryant). Remember Trow Pool needs YOU!

Quick go to the Web

**O**ur web site is up and running so check it out. Type in the above address or you could try a search on Google with key words like *Trow Pool* or *Carp*.

Support your local club and buy your permit from us because...

**O**ur new permits are now on sale at J & K Tackle, Bicester so pop down and buy one. They're the same price as last year, £10.00 for juniors and £15.00 for adults.

A permit gives you 365 days fishing (nights by appointment) and you can't beat this deal ANYWHERE. It also gives you other areas to fish as we are affiliated to ODAA.

In addition you get a free Newsletter, web site and much more.

**I**f you catch a carp or any fish for that matter, send in your photo to me and I'll either put it in the Newsletter or on the web site.

I don't have any new photos this time so come on where are all those catches?

And don't forget the trophy for the biggest catch - it could be you!

**T**row is fishing well. It's very weedy at the moment but this does lend itself to surface fishing either on the weed (where carp are feeding) or on the edge of the weed. I use bread and freeline which is very successful.

Try to position the bread right on the edge of the weed near a channel or opening in the water. Ensure that no line is effectively in the water but instead draped over the weed. That way the carp are not spooked by the line and are forced to slurp at the bread. I have a couple of secret ways to prepare the bread but that's another fishy story!

Did you Know ? You can book the whole of Trow Pool for special events such as birthdays. The committee can also arrange for photos and a special fishing competition with certificates. See section 9 of the web site, it's a cracker.

...our permits give you year round fishing (days & nights), a free news letter, open days fishing trips, free tuition, a web site and most importantly a safe & friendly place to fish.
